Objective

Willing to be a part of dynamic organization where I could meet challenging roles in career to give my best shot with a one team feeling.

Work History

Dec 2021 – Till Date	EPAM Systems
Apr 2019 – Dec 2021	Capgemini
May 2016 – Apr 2019	Verizon
Dec 2014 – May 2016	Prodapt
Apr 2014 – Nov 2014	Tata Consultancy Services
Aug 2011 – Jan 2014	Cognizant

Technical Skills

Technologies/ Frameworks/ Libraries	HTML5, CSS3, JavaScript, jQuery, SASS/SCSS, RequireJS, KnockoutJS, HandlebarsJS, ReactJS, NextJS, BackboneJS, NodeJS, Redux, MongoDB, Jest, Enzyme, Redux, MobX, QtGStreamer, Objective-C, Bootstrap, PhoneGap.
Operating Systems	Windows 98/XP/2000/7/10, MAC, Linux.
Tools	IntelliJ IDEA, Visual Studio Code, SVN, Grunt, Git, Adobe Dreamweaver, Adobe Photoshop, Adobe After Effects, Adobe Fireworks, Adobe Illustrator, Apple Xcode, Apple Dashcode, Eclipse, NetBeans, Sublime Text, Salesforce Mobile SDK, TimeStorm, Qt Creator, Qt Designer.
AI Tools	Trae, Cursor, GitHub Copilot, GitLab Duo
Methodologies	Agile, Waterfall
Domains	Networking, Healthcare, Banking, Telecom.

Key Achievements

- Utilized thorough knowledge of Internet Applications, web page design and HTML programming to create and maintain interactive multi page mobile web sites.

- Demonstrated strong skills in object-oriented programming and the use of abstract data types.

- Mentored and designed mobile applications for iPhone, iPad Android, Win7 smartphone and tablets.

- Involved in UI development to create seamless customer experience for high traffic mobile and smartphone application interfaces.

- Web application development for backend system using JavaScript with cutting edge HTML5 and CSS3 techniques.

- Refine and iterate user experience by designing and implementing new modules and interfaces in a complex, responsive site.

- Built html templates for high traffic and complex data driven websites.

- Created cross-platform compliant applications for major organizations reaching thousands of recipients.

- Regularly discuss with clients to review project goals and to create proposals for future developments, researching their fields for UI/UX design.

Current Experience Summary

Organization	EPAM Systems
Customer	IQVIA
Role	Technical Architect
Technologies	HTML5, CSS3, JavaScript, React, Redux, SASS/SCSS.
Responsibilities	- Architect Study Management Portal (SMP) of IQVIA-IHP. - Accountable for complete front-end from development till delivery/deployment.
Description	**ftdregistryadmin.ihp.iqvia.com** This is a study management portal of an integrated health platform. SMP is a product which is consumed by multiple projects/clients. It is for admins who manages the health study. The application is built with a product standpoint for projects to consume it by extending the functionalities/over-riding them as per customer demands/needs. Authentication is via auth0, and authorization is via a custom feature GUID mechanism built by me. As the application is built as a product, it is not built as a standard react application and instead, I have introduced a new pattern called renderers. Since I own the product application, the projects consuming it is also directed by me but handled by different team. Also, the product application's DLS (Design Language System) and Core (Application Services) are built as packages (explicit node modules) and exposed in IQVIA nexus repository for other IQVIA-IHP applications like DTP(Direct to Participant), CC (Call Center), Cohort and so on.

Organization	EPAM Systems
Customer	Goldman Sachs
Role	POD Manger / Technician Team Lead
Technologies	HTML5, CSS3, JavaScript, React, MobX, SASS/SCSS.
Responsibilities	• UI POD lead accountable for sprint deliverables on the welcome experience portfolio. • Individual contributor.
Description	**gsselect.com** This is a maintenance cum support project which involves bug fixes and feature development on the welcome experience portfolio in goldman.com

Previous Experience Summary

Organization	Capgemini
Customer	CalAmp
Role	UI Technical Lead
Technologies	HTML5, CSS3, JavaScript (ES2020/ES11), React, Redux, NPM, Next, Material UI, SCSS, TypeScript, Immer, Jest, Enzyme.
Responsibilities	• Reviewed design with UX design team and product owners. • Built initial application architecture with onshore principal architects. • Pro-active engagement with onshore principal architects in rolling out any new process checklist. • Lead offshore dev team as a scrum master, effort tracker, task assigner, tech design/code reviewer ... • Worked as an individual developer and extended support to team in case of any technical difficulties.
Description	**ion.calamp.com** **rdrivedealer.lojack.com** **inventory.lojack.com** These are fleet management systems where CalAmp manufactures the devices to be installed in dealer's/customer's vehicles. The devices associated with vehicles provide features like geofencing, crash reports, mileage details, battery details, engine details and so on. This portal is for use by CalAmp admins, subscribed or unsubscribed dealers/customers.

Organization	Verizon
Customer	Verizon
Role	Module Lead
Technologies	HTML5, CSS3, JavaScript (ES2015/ES6), Require, Backbone, React, Redux, Handlebars, Material UI, SCSS, Immutable.
Responsibilities	• Module lead who took complete ownership of the lower funnel flow (cart, checkout, and order summary) for new customers and existing customers in both web and mobile. • Module lead who took complete ownership of CPC (Calling Plan Change) for existing customers in mobile. • Individual contributor in one-digital kiosk application.
Description	**verizonwireless.com** This is an ecommerce application involving three layers of code flow as MySQL(back-end), Java(middle-end) and BackboneJS (front-end). The existing code flow with the above-mentioned tech stack was migrated/enhanced with a new tech stack. The new tech stack involves MySQL(back-end), Java(middle-end) and ReactJS/Redux(front-end).

Organization	Prodapt
Customer	Liberty Global
Role	Lead Developer
Technologies	HTML5, CSS3, JavaScript (ES2015/ES6), Require, Knockout, jQuery, Handlebars, Bootstrap, Material UI, SCSS.
Responsibilities	• Worked as UI developer and took complete responsibility of GUI. • Built view json data to be stored at server end. • Built json parser framework to build GUI with json data from server.
Description	**libertyglobal.com** This is a dashboard application involving three layers of code flow as Oracle(back-end), Java(middle-end) and HTML5(front-end). This dashboard monitors the data flow through various layers providing the status at each layer. Voice, Internet, and DTV are the various data monitored by the application. The application reports data on a weekly, monthly, and daily basis via charts.

Organization	Tata Consultancy Services
Customer	Giant Eagle
Role	Lead Developer
Technologies	HTML5, CSS3, JavaScript, jQuery, Require, Bootstrap, SASS/SCSS.
Responsibilities	• Took complete responsibility in developing the front-end of the application. • Built a prototype before turning over the designs to actual application. • Developed the GUI and functionalities using HTML5, CSS3, SASS/SCSS, JavaScript, jQuery, Bootstrap, RequireJS, SMACSS/BEM.
Description	**marketdistrict.com** This is an enhancement project which involves re-architecting the user interface using HTML5, CSS3 and JavaScript.

Organization	Cognizant
Customer	Abbott
Role	Senior Developer
Technologies	HTML5, CSS3, JavaScript, jQuery, jQuery Mobile, PhoneGap, Bootstrap.
Responsibilities	• Developed images and icons as per iPad retina display specs. • Merged bootstrap with JQM to maintain single page navigation model together with RWD. • Leveraged PhoneGap ChildBrowser plugin to make the application hybrid.
Description	**myalcon.com** This is a hybrid and browser version POC in SFDC cloud through which Alcon market their products to customers. The application communicates with the cloud through forceTK client and updates the local Web SQL database. Customers can view the products; select the products as per category->subcategory and so on. Application's UI was structured using jQuery mobile and bootstrap. The application was made hybrid using Cordova which includes ChildBrowser plugin. The application loads SFDC inside ChildBrowser in device whereas local web browser in portal.

Organization	Cognizant
Customer	Comcast
Role	Developer
Technologies	HTML5, CSS3, JavaScript, jQuery, AJAX, DOM, Objective-C, SCSS.
Responsibilities	- Wrote custom CSS media queries to detect various viewports and orientations. - Used Adobe Fireworks to create CSS Sprites. - Designed images and app logos to adapt to various resolutions. - Worked with Apple Xcode to develop a seamless native app-like experience on a hybrid source code.
Description	**xfinity.com** This is a HTML5 based mobile application consisting of widgets. Widgets represent the program and ad information as per selected channel. The application lists the channel based on various criteria like time, day, most popular and so on. Widgets can also overlap in the UI which allows user to use one large widget for the background and make other widgets transparent, so they all get the same background color or image. Used HTML5 to describe the CAFE widget application. Within the application, widgets are inserted using iframes. The CAFE application launch library has been updated such that it can launch and render multi-widget applications built in both HTML/JavaScript/ CSS and Objective-C (an Objective-C application could simply be another WebView, or a block containing a piece of classical Latin text).
